COMPLETE FIRE SECURITY

A CONCEPTS ENTERPRISE

FIRE DESTROYS IN MINUTES!

The need for Fire Security acute. Incidents of loss of life and property continue to highlight the appalling state of security measures existing in various structures. The "IT CAN NEVER HAPPEN TO ME" attitude is the chief cause for complacency. Do not give in to complacency. Secure yourself today.

PRODUCT DATA

■ GENERAL DATA

All the products bear the properties listed below.

- ❑ Material of Construction : Cast Iron, Mild Steel, Galvanized Steel, Aluminum, Bass, Gun-Metal, Copper, Rubber, Canvas, depending on the product.

■ PRODUCT SPECIFIC DATA

Some of the product specific data is available in this catalogue alongside the images. Other data is available on the price list.

■ MANUFACTURE

- ❑ Where are the products manufactured?
- ❑ All the products are made in India.

- ❑ What is the basic raw material used in the manufacturing the products?
- ❑ All the products are made from different raw materials, either metallic or non-metallic. There is no single raw material for all products.

■ PRODUCT RANGE

- ❑ What are the different products available?
- ❑ Ness Securities range of products covers the following equipment:
 - ❑ Fire-Fighting first aid equipment such as fire-extinguishers, sand buckets, fire-axes, fire beaters, fire-hooks, fire-blankets, etc.
 - ❑ Fire-Hydrant system accessories such as hydrants, hoses, hose reel drums, hose cabinets, hose couplings, hose nozzles, monitors, adaptors, etc.
 - ❑ Fire-Sprinkler system accessories such as sprinklers, sprinkler droops, sprinkler rosettes, sprinkler guards, alarm valves, etc.

■ CHARACTERISTICS

- ❑ What is the approximate lifespan of the product?
- ❑ Each product has a different life span. Products made of rubber or canvas have a lifespan of approximately 5-6 years. Metallic products, if not damaged by weather conditions or mechanical damage, can last up to 20 years also.

- ❑ Do changes in environmental conditions affect the life of the finish?
- ❑ The products do not change colour or fade on exposure to the sun. High humidity and saline content in the air can cause corrosion of ferrous metal equipment and tarnishing of non-ferrous metal equipment.

- ❑ What is the shelf life of the product?
- ❑ The extinguishing agents have a shelf life of approx. 1 year. Rubber and canvas products have a shelf life of approx. 5-6 years. Other metallic products are not affected.

■ MAINTENANCE

- ❑ Can the products be maintained easily?
- ❑ Any fire protection system, once installed, should be put under an AMC. This ensures adequate functionality of the system and longevity of the components of the system.

■ SUPPORT

- ❑ Is there any warranty on the products?
- ❑ The products are guaranteed for 1 Year against any manufacturing defect, notwithstanding any defects arising on account of physical damage or poor workmanship. The guarantee is limited to product replacement.
